

ABDELRAHMAN ASHRAF MOUSTFA

Cairo, Egypt | abdelrahman.a.moustfa@gmail.com | +20 1149513460 | linkedin.com/in/abdelrahman-ashraf1

PROFESSIONAL SUMMARY

Cybersecurity student and VAPT trainee building practical depth in network penetration testing, Active Directory security, Linux/Windows privilege escalation, and web application security. Hands-on exposure to structured reconnaissance, enumeration, vulnerability validation, controlled exploitation, and technical reporting using Kali Linux, Nmap, Wireshark, Metasploit, and Burp Suite. Currently strengthening offensive-security skills through DEPI and an intensive penetration-testing diploma.

EDUCATION

B.Eng. Cyber Security and Data Analysis | Menoufia University, Faculty of Electronic Engineering | 2023 - 2028

TRAINING & HANDS-ON EXPERIENCE

Vulnerability Analyst and Penetration Tester - DEPI | Trainee | Jul 2026 - Present

- Completed the core cybersecurity/VAPT fundamentals and progressed through the Network Penetration Testing phase, with practice in host discovery, scanning, service enumeration, vulnerability validation, and attack methodology.
- Currently studying Active Directory security as the next stage of the track, focusing on Windows domain concepts, AD architecture, enumeration fundamentals, and common security weaknesses in controlled environments.

Cybersecurity & Penetration Testing Diploma - Instant | Student / Trainee | Jan 2026 - Present

- Completed hands-on web-security training covering HTTP requests/sessions, Burp Suite workflow, SQL Injection, XSS/DOM XSS, CSRF, OS Command Injection/RCE, authentication attacks, and JWT vulnerabilities.
- Continued into advanced topics including LFI/path traversal and PHP wrappers, SSRF and filter bypassing, file-upload vulnerabilities, SSTI, race conditions, HTTP request smuggling, and API attacks.
- Applied techniques in authorized labs by intercepting and modifying requests, analyzing parameters/cookies/sessions, validating vulnerabilities, reproducing findings, and documenting evidence and remediation.

SOC Analyst Internship - Archon Security | Intern | Nov 2025 - Dec 2025

- Triaged security alerts and reviewed suspicious endpoint/network activity using Sysmon, ProcMon, Process Explorer, TCPView, Netstat, Tasklist, and Wireshark; created basic IOC and incident notes.

PROJECTS & LABS

Internal Penetration Testing - Project Ban-Win7 | Windows 7 Lab

- Conducted a controlled internal assessment and produced a 5-page penetration-testing report covering scope, technical walkthrough, evidence, severity, impact, and remediation recommendations.
- Documented 5 findings, including full system compromise, plaintext credential disclosure, spyware persistence, offensive tooling, and information leakage.

Selected Vulnerable-Machine Labs | Kioptrix Level 1, Metasploitable 2, Moria 1.1, Tomghost

- Completed 4 controlled labs involving host discovery, port scanning, service enumeration, vulnerability validation, exploitation, and privilege escalation.

Web Application Security Labs | Burp Suite, HTTP, Browser DevTools

- Practiced request/response manipulation, session and cookie analysis, authentication testing, input-handling tests, and manual web-vulnerability validation in legal lab environments.

TECHNICAL SKILLS

VAPT: Reconnaissance, scanning, enumeration, vulnerability assessment/validation, exploitation basics, privilege escalation, penetration-testing methodology, reporting

Web Security: HTTP/HTTPS, SQL Injection, XSS/DOM XSS, CSRF, OS Command Injection/RCE, authentication/JWT, LFI/path traversal, SSRF, file upload, SSTI, race conditions, request smuggling, API attacks

Networking: TCP/IP fundamentals, ports/services, host discovery, service enumeration, packet/traffic analysis

Active Directory: Windows domain and AD security fundamentals - currently studying

Tools: Kali Linux, Nmap, Wireshark, Metasploit, Burp Suite, LinPEAS, WinPEAS

Systems & Scripting: Linux, Windows, Windows Server, Ubuntu, Python basics, Bash basics, PowerShell basics, C/C++

CERTIFICATIONS

- Cybersecurity & Penetration Testing Diploma - Instant | In Progress
- SOC Analyst - Archon Security | 2025
- Cybersecurity for Beginners - Mahara-Tech
